
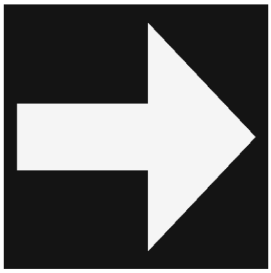
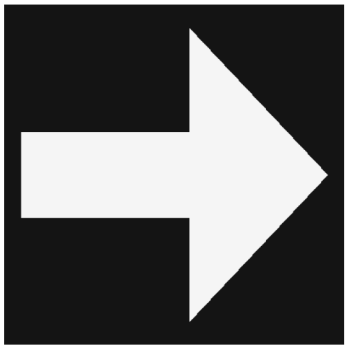
35 mm



35 mm spare



45 mm (if it fits)

WHITE ARROW v2 on BLACK. Head:tail width 3.4:1 — this is what makes the direction readable. The earlier version was 1.1:1 and the head/tail decision flipped with the threshold.

Measured on v2: 48 combinations (8 rotations x 2 perspectives x 3 blurs), 0 failures, worst error 8.3 degrees.

The POINT is the car's front. Cut out the black square, tape on the roof.

Print 100%, normal quality, matte. Measure the 100 mm line.
