

SIMPLE MARKER: white square + one solid black triangle. Two shapes only.

The triangle's POINT is the car's FRONT. An arrow above it shows which way.

Print at 100%, normal quality (not draft/eco). Black should look black.

Cut outside the white square, keep the white border — it is the contrast

against the roof, and it is what lets the search window find it.

Measure the 100 mm line below before trusting the size.
